

PRESHEN GOVENDER

INTERMEDIATE SOFTWARE DEVELOPER | C# / .NET | BACKEND & FULL STACK

Durban, South Africa | +27 81 344 6771 | preshen4@gmail.com | preshen.co.za | LinkedIn

PROFESSIONAL SUMMARY

Intermediate Software Developer with 3+ years of professional experience and a Bachelor of Computer and Information Science in Application Development. Strong backend focus with hands-on experience building production systems using C#, .NET, ASP.NET Core, SQL Server, Dapper and REST APIs, complemented by full-stack experience with React and TypeScript. Experienced in financial and transaction-driven systems, multi-tenant applications, payment integrations, authentication/authorisation, real-time functionality, dashboards and mobile applications.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Python

Backend & APIs: .NET, ASP.NET Core, Web API, REST APIs, Entity Framework Core, Dapper, Node.js, Express

Frontend: React, React Native, Vite, TypeScript, Material UI, Tailwind CSS

Databases: SQL Server, PostgreSQL, MongoDB

Development & Infrastructure: Git, GitHub, Docker, CI/CD, Postman, CircleCI, Azure

Engineering: API Design, Database Design, Authentication & Authorisation, RBAC, Query Optimisation, Code Refactoring, Third-Party API Integration, Secure Data Handling, Multi-Tenant & Real-Time Systems

PROFESSIONAL EXPERIENCE

Intermediate Software Engineer — Bridge Labs

Jun 2025 – Aug 2026

- Developed production backend and full-stack features across CompleteFarmer and SaferCity using C#/.NET, React/React Native, APIs and databases.
- Built mobile applications and dashboards supporting business-critical workflows and real-time data across ~5,000+ active users.
- Implemented role-based authentication/authorisation, payment gateway integrations and secure data handling for CompleteFarmer.
- Implemented real-time panic and alert functionality for SaferCity, with alerts reaching responders in under ~3 seconds on average.
- Improved application performance through code and query optimisation, reducing key page/API load times by roughly 30–40%, and streamlined scaffolding of DAL/BL components, cutting time to add a new module by around ~50%.
- Worked across concurrent client projects, adapting to unfamiliar codebases and collaborating with developers and stakeholders to deliver production features.

Technologies: C#, .NET, ASP.NET Core, SQL, React, React Native, TypeScript, REST APIs, Git

Junior Software Engineer — EasyGames

Jan 2024 – Jun 2025

- Developed production gaming functionality using C#/.NET and SQL, supporting financial transactions and player data across roughly ~10,000 transactions/day.
- Designed and implemented functionality for a multi-tenant betting aggregation platform supporting multiple operators, scaling from a single tenant to ~8 operators.
- Introduced Dapper for performance-sensitive data access, cutting average query response times by an estimated ~40–50% versus the previous ORM approach.
- Developed APIs and backend services supporting live betting and transaction workflows across four products.
- Investigated issues across application, API and database layers and collaborated on production delivery.

Technologies: C#, .NET, SQL Server, Dapper, REST APIs, Git

Full Stack Developer Intern — Dipar System

May 2023 – Nov 2023

- Developed C#/.NET APIs and supported dashboard functionality for real-time application data.
- Worked with SQL and refactored existing code to improve maintainability and align with updated standards, reducing flagged code-review issues by roughly ~25% over the internship.

Technologies: C#, .NET, SQL

SELECTED PROJECTS

Lotto / Lucky Numbers: React, C#/.NET, SQL Server — full-stack lottery platform. **Horse Racing Data & Event System:** Python, C#, .NET Worker Service — automated scraping and background processing.

Velitech API Integration: C#, REST APIs, HMAC SHA-512, RestSharp — secure third-party API integration and authentication troubleshooting.

MDLink: React Native, Expo, TypeScript, Next.js, PostgreSQL — medical information transfer platform concept.

EDUCATION & ADDITIONAL

Bachelor of Computer and Information Science, Application Development — Pass with Distinction

IIE Varsity College, 2023

HackerRank Certificate (2021) • Backend-focused development • Problem solving & debugging • Cross-functional collaboration • Technical communication • Rapid adaptation to unfamiliar codebases
